ABOUT ME

I'm a team player. I've 2+ years of experience working as a Front End Developer with diverse web technologies that mostly Front End and some of the Back End. Write perform and robust code for SaaS software by maintaining the SOLID class to make software designs more understandable, flexible, and maintainable.

Project management experience by including new features and testing the code using JavaScript testing frameworks like Mocha/Jest and uploading error-free code into the production server properly using Docker, GitHub Actions, etc.

I'm interested to work in a role that will allow me to design develop and implement client-side solutions in a highly engaging, collaborating, and constantly improving team. Also where I can work with various types of solutions and technologies that leading the world.

ORGANIZATIONAL SKILLS

- Sound ethical background & presentation skills.
- Ability to work independently & as a team player
- Excellent interpersonal & communication skills.
- Endurance to work for long hour and pressure
- Strong motivation and commitment for work
- Quick learner and fast problem solver
